Re: Radiofone PCS, L.L.C.
CC Docket No. 94-102

Dear Ms. Dortch:

Radiofone PCS, L.L.C. ("Radiofone") is the licensee of Broadband PCS Station KNLH426 (Market B186 - Hattiesburg, MS BTA D-Block). It is our understanding that certain Tier III CMRS carriers have been directed to file an Interim Report with the FCC on or before August 1, 2003, describing in detail their implementation plans for Wireless E911 Phase II Automatic Location Information.¹ In lieu of filing an E-911 Interim Report, and to answer any questions that the Commission's staff may have regarding Radiofone's regulatory compliance, we provide the following information:

As described in the five-year buildout showing for Station KNLH426, Radiofone has constructed its D-Block broadband PCS system in the Hattiesburg BTA using Airspan's AS4000 wireless DSL platform.² As of this time, Radiofone is utilizing its Hattiesburg BTA broadband PCS system to provide high-speed data services only.

Because Radiofone is not using its broadband PCS network to provide "real-time, two way switched voice service that is interconnected with the public switched network," the Company's operations fall outside the scope of the E-911 service requirements set forth in Section 20.18 (a) of the Commission's Rules, as well as the Interim Reporting requirements set forth in the *Non-Nationwide Carrier E911 Order*. For this reason, Radiofone has not needed to file a request a waiver of the Commission's E-911 Rules.

¹ See Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems, CC Docket No. 94-102, *Order to Stay* (rel. July 26, 2002) ("*Non-Nationwide Carrier E911 Order*") at paras. 34-35.

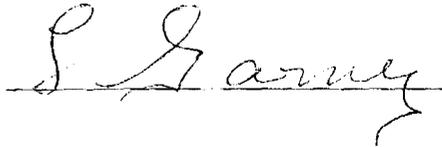

² See FCC Form 601 Required Notification, FCC File No. 0000883827 (*filed* May 10, 2002).

Should Radiofone decide in the future to provide interconnected voice services that fall within the scope of Rule Section 20.18, we will comply with applicable regulatory obligations with respect to E-911.

Respectfully submitted,

Radiofone PCS, L.L.C.
