

I work in the field of healthcare communications, providing continuing medical education programs. The following comment is in regard to "unsolicited facsimile advertising requirements". Removing the "established business relationship" qualification from the fax regulations will adversely impact the conduct of business and communication with industry partners. It is unclear which transmissions the FCC would interpret as commercial in nature, whether written consent to a national association would extend to chapter or affiliate faxes, and whether a written consent form would expire with membership. These are but a few of questions and concerns I have about these regulations. I urge the FCC to consider the impact of these regulations on the conduct of business and clarify these issues prior to implementation of the regulation.
