

Please approve this action. I look forward to participating fully in the advancement of widecasting for the benefit of the citizens of the country.

Our capability to disseminate important timely information at NO COST to the government has many obvious advantages:

- geographically dispersed system: no central point of vulnerability
- immunity to shutdown in emergencies,
- no cost to the taxpayers,
- modern but easily accessed communication modes,
- high reliability, very little spectrum space used,
- high flexibility, interoperability with official agencies.
