The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

Betty Higgins

[recipient name was inserted here],

The Federal Communications Commission is unfortunately apparently right now considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans, some retired and on fixed incomes, like me, could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned and puzzled about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. I thought the whole idea of the 1996 communications deregulation law was to avoid this sorry situation! As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

Burnis E. (Gene) Tuck
