

I OPPOSE the petition by the Coppola family. I not that all three are no-code Technician Class licensees who essentially want immediate license upgrades for themselves personally without having to meet any additional requirements or examinations.

What a fine example Mr. Coppola has set for his children.

They should be ashamed of themselves.

I urge the Commission to REJECT this petition for what it is: A self-indulgent, self-serving plea by a family of individuals with too little motivation to even meet the minimal standards of the current Amateur Service licencsing requirements.

How very sad for the children.
