

I believe that through modifying parts 2 and 15 of the unlicensed equipment approval would greatly benefit everyone. In doing so you will be allowing more and more people with unlicensed equipment to be able to transmit/broadcast their information. Not only will this help those people who sell the equipment in the way of bringing in more customers, but also it will help people such as WISPS with creating a wider area of broadcast. Along with making it more readily available for people who are unable to get high speed Internet, Internet through the use of wireless technology.
