

My neighbor Bill Golden 619 Williams ave (419)228-3291 has installed a high powered cb radio.He has a high powered leiner which enables him to talk from Ohio to California. He has installed 2 anteanas over 50 ft. high, and is installing another one today. This radio broadcasts over my computer and home stereo. I cannot use my computer when his cb is on. We can hear evrything broadcasting even thru our stereo which is not turned on. Other people in the neighborhood are experiencing this problem also.We have tried talking to him but he is uncooperative. We would like to use our computer and not listen to his cb every night he has it on, is there something you can do to help us, and is this leagal?

Thank you for your time.
