

I reported to you in the past that the local cable station and Dish Network were charging us for channels that are nothing but prepaid advertising and junk that no body wants to see and you said you can't control the content of what they charge us for. Well that's a bunch of crap and needs to be changed. you need to regulate the cable and dish systems as what they charge us for because they are cheating us all. Just count the number of commercials and the frequency of them. They are over advertising everything which needs to STOP and you have to Stop them now.
