

Requesting FCC begin systematic review of communication tower and mortality issues;institute research program funded by the communications industry, to identify tower placement,design and lighting conditions that result in bird mortality;  
undertake environmental reviews of all existing towers to assess their placment and design with regard to migratory bird impacts;  
require that all proposed towers be subjected to rigorous environmental reviews;and implement immediate protections based on existing knowledge, such as the voluntary tower siting and placement guidelines developed by the U.S. Fish and Wildlife Service
