

Of all the CW-related proposals (thirteen) that I have commented on, RM-10811 makes the most sense to me. If I had to choose one proposal to go with, it would be RM-10811. I am in total agreement with everything this proposal calls for. One area that I could go either way on is to either keep the Morse Proficiency testing rate at 5 wpm for both General and Extra or to allow for the Morse Proficiency testing rate to be increased to 12 wpm for Extra, while the Morse Proficiency testing rate for General remains at 5 wpm.

Great proposal. I ask the FCC to adopt this one.

Respectfully Yours,

Mark M. Oring
