

This is very much a concern of mine. I have a very close relative that is deaf. She truly relies on closed captions for her ears. There has been several times that the news, interruptions and other important information is not given to her due to her unable to hear. It is not fair that I can hear what is being said but she can not, when we know that it is possible. We feel it necessary to send people to the moon, send money over seas but neglect our own. You are responsible because you have the power to change the situation. Will YOU!
