

I should be able to record anything I desire off of my television like my VCR, and a corporation should not be able to dictate what I shall record wherever technology takes us.

The M.P.A.A and R.I.A.A fought the, VCR, AM broadcasts, FM broadcasts, FM stereo broadcasts, HI-FI (or audio that didn't sound like it did in 1929), and tape recorders too, and without it we would not have, surveillance systems, video cameras, video store rentals, multitrack recorders, FM, FM stereo, music radio broadcasts, Hi-Fi, Dolby Noise Reduction, compact disc players, and etc.

They fought every one of these, claiming the end, but don't take my word for it, research learn, don't be manipulated.

"The growing and dangerous intrusion of this new technology," Jack Valenti said, threatens an entire industry's "economic vitality and future security." Mr. Valenti, the president of the Motion Picture Association of America, was testifying before the House Judiciary Committee, and he was ready for a rhetorical rumble. The new technology, he said, "is to the American film producer and the American public as the Boston Strangler is to the woman alone." Jack Valenti 1982 - views on video cassette recorders.

Don't let corporations turn this place into a third world country, absolute power corrupts.
