Commissioner Kathleen Q. Abernathy
Federal Communications Commission
445 12th Street, NW
Washington, D.C. 20554

Dear Kathleen Abernathy,

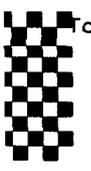

I am writing to voice my opposition to any FCC-mandated adoption of "broadcast flag" technology for digital television. As a consumer and citizen, I feel strongly that such a policy would be bad for innovation, consumer rights, and the ultimate adoption of DTV.

A robust, competitive market for consumer electronics must be rooted in manufacturers' ability to innovate for their customers. Allowing movie studios to veto features of DTV-reception equipment will enable the studios to tell technologists what new products they can create. This will result in products that don't necessarily reflect what consumers like me actually want, and it could result in me being charged more money for inferior functionality.

If the FCC issues a broadcast flag mandate, I would actually be less likely to make an investment in DTV-capable receivers and other equipment. I will not pay more for devices that limit my rights at the behest of Hollywood. Please do not mandate broadcast flag technology for digital television. Thank you for your time.

Sincerely,

James Tomlinson

Commissioner Kathleen Q. Abernathy
Federal Communications Commission
445 12th Street, NW
Washington, D.C. 20554

Dear Commissioner Kathleen Q. Abernathy:

As a broadcast television viewer and consumer of electronics and computer products, I urge the Federal Communications Commission to vote against the adoption of a "broadcast flag." I am outraged that the FCC would consider a regulation would restrict the way I enjoy television.

The broadcast flag is neither in my interest nor the public's interest. It will prevent me from watching digital broadcast television in the ways I currently enjoy analog broadcast television—for example, it will restrict my ability to move the video I have recorded for personal viewing from room-to-room and place-to-place.

The broadcast flag will also lock out my computer as a way to watch my favorite shows using my choice of software on a plane or train, or to send a television clip of a high school football game to family and friends.

Furthermore, if computers cannot freely receive digital television, how can I expect creative developers to discover new devices that enable me to use content in exciting ways I haven't even thought of? I value innovative devices like TiVo, ReplayTV and the Windows Media Center PC, which exist today because they were built to open standards using inexpensive, off-the-shelf computer parts.

If the move to digital television does not make the public's viewing experience more enjoyable, flexible, and exciting, what compelling reason do I have as a consumer to buy new digital television equipment? A prettier picture is hardly enough reason for me to dispense with all my current consumer electronics and computer equipment. As a citizen and viewer of broadcast television, I urge you to promote the digital television transition by opposing adoption of the broadcast flag.

Sincerely,

CHRIS DOOLEY

I value innovative devices like TiVo, ReplayTV and the Windows Media Center PC, which exist today because they were built to open standards using inexpensive, off-the-shelf computer parts.

I currently have a DVR and before that I had 2 VCRs and the DVR has really revolutionized the way I watch TV; no more hassling w/tapes or rewinding and fast-forwarding. TimeWarnerCable provides a very nice DVR that lets you record 2 shows at once while watching a 3rd show on the hard drive. I would hate not to be able to record shows anymore or not at full 1080i quality when their HDTV box comes out.

If the move to digital television does not make the public's viewing experience more enjoyable, flexible, and exciting, what compelling reason do I have as a consumer to buy new digital television equipment? A prettier picture is hardly enough reason for me to dispense with all my current consumer electronics and computer equipment. As a citizen and viewer of broadcast television, I urge you to promote the digital television transition by opposing adoption of the broadcast flag.

Sincerely,

Patrick Helwig

445 12th Street, NW
Washington, D.C. 20554

Dear Kathleen Abernathy,

I am writing to voice my opposition to any FCC-mandated adoption of "broadcast flag" technology for digital television. As an amateur radio operator, consumer, and citizen, I feel strongly that such a policy would be bad for innovation, consumer rights, and the ultimate adoption of DTV.

A robust, competitive market for consumer electronics must be rooted in manufacturers' ability to innovate for their customers. Allowing movie studios to veto features of DTV-reception equipment will enable the studios to tell technologists what new products they can create. This will result in products that don't necessarily reflect what consumers like me actually want, and it could result in me being charged more money for inferior functionality.

*Of specific interest is how the broadcast flag requirement would make such devices as current VCRs and "personal video recorders" (TiVo, etc) unable to "time-shift" DTV programming, a right guaranteed to the consumer. Additionally, such a flag would give the MPAA control of the licensing for the creation of such equipment of VCRs, stifling the ability of small businesses to compete with the companies that are large enough to be respected by the MPAA, or worse, great contributors to the MPAA (Sony). The MPAA should not be given the right to control the licensing or earnings of any copy protection or restitution scheme. The MPAA does not represent the interests of the consumer, and is not interested in protecting the rights of the consumer or the independent artist or broadcaster.

If the FCC issues a broadcast flag mandate, I would actually be less likely to make an investment in DTV-capable receivers and other equipment. I will not pay more for devices that limit my rights at the behest of Hollywood. Please do not mandate broadcast flag technology for digital television. Thank you for your time.

Washington, D.C. 20554

Dear Kathleen Abernathy,

I am writing to voice my opposition to any FCC-mandated adoption of "broadcast flag" technology for digital television. As a consumer and citizen, I feel strongly that such a policy would be bad for innovation, consumer rights, and the ultimate adoption of DTV.

A robust, competitive market for consumer electronics must be rooted in manufacturers' ability to innovate for their customers. Allowing movie studios to veto features of DTV-reception equipment will enable the studios to tell technologists what new products they can create. This will result in products that don't necessarily reflect what consumers like me actually want, and it could result in me being charged more money for inferior functionality.

If the FCC issues a broadcast flag mandate, I would actually be less likely to make an investment in DTV-capable receivers and other equipment. I will not pay more for devices that limit my rights at the behest of Hollywood. Please do not mandate broadcast flag technology for digital television. Thank you for your time.

Sincerely,

Michael Keepper
