

October 12, 2003

Commissioner Michael J. Copps  
Federal Communications Commission  
445 12th Street, NW  
Washington, D.C. 20554

Dear Michael Copps,

I am writing to voice my opposition to any FCC-mandated adoption of "broadcast flag" technology for digital television. As a consumer and citizen, I feel strongly that such a policy would be bad for innovation, consumer rights, and the ultimate adoption of DTV.

A robust, competitive market for consumer electronics must be rooted in manufacturers' ability to innovate for their customers. Allowing movie studios to veto features of DTV-reception equipment will enable the studios to tell technologists what new products they can create. This will result in products that don't necessarily reflect what consumers like me actually want, and it could result in me being charged more money for inferior functionality.

If the FCC issues a broadcast flag mandate, I would actually be less likely to make an investment in DTV-capable receivers and other equipment. I will not pay more for devices that limit my rights at the behest of Hollywood. Please do not mandate broadcast flag technology for digital television. Thank you for your time.

Sincerely,

Keith Wacienski  
5337 S. Hyde Park #205  
Chicago, IL 60615  
USA

This will result in products that don't necessarily reflect what consumers like me actually want, and it could result in me being charged more money for inferior functionality.

If the FCC issues a broadcast flag mandate, they should put together a panel of disinterested professionals who will have in mind consumer's rights as well as Hollywood's. Putting the people who tried to ban VCR's and TiVo's in charge of such a thing could be devastating for those of us who work non-standard hours and would like to be able to watch some prime-time television.

Please do not mandate broadcast flag technology for digital television. Thank you for your time.

This will result in products that don't necessarily reflect what consumers like me actually want, and it could result in me being charged more money for inferior functionality.

If the FCC issues a broadcast flag mandate, I would actually be less likely to make an investment in DTV-capable receivers and other equipment. I will not pay more for devices that limit my rights at the behest of Hollywood. Please do not mandate broadcast flag technology for digital television. Thank you for your time.

Sincerely,

Lester Schweiss

Dear Michael Copps,

I am writing to voice my opposition to any FCC-mandated adoption of "broadcast flag" technology for digital television. As a consumer and citizen, I feel strongly that such a policy would be bad for innovation, consumer rights, and the ultimate adoption of DTV.

A robust, competitive market for consumer electronics must be rooted in manufacturers' ability to innovate for their customers. Allowing movie studios to veto features of DTV-reception equipment will enable the studios to tell technologists what new products they can create. This will result in products that don't necessarily reflect what consumers like me actually want, and it could result in me being charged more money for inferior functionality.

If the FCC issues a broadcast flag mandate, I would actually be less likely to make an investment in DTV-capable receivers and other equipment. I will not pay more for devices that limit my rights at the behest of Hollywood. Please do not mandate broadcast flag technology for digital television. Thank you for your time.

Sincerely,
