**Subject:** Please Support the Consensus Plan -- FCC WT Docket #02-55

Commissioner Kevin J. Martin  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Commissioner Martin,

Emergency response communications have never been more critical, or more difficult

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Peggy Novy  
201 E Lincoln  
Reddick, Illinois 60961

cc  
Senator Richard Durbin

Dear Commissioner Martin,

As a Law Enforcement dispatcher for my local sheriff's office, I personally know how important it is for clear radio reception. It is very aggravating when I send a deputy to a call or they make a traffic stop, and can't get out on the radio when I try to check on them. You never know if it's just the radio or if they are in some type of danger. Law Enforcement as well as Emergency Medical Responders, and Firemen deserve nothing less than to be able to communicate with other officers or their dispatchers. The 12 (twelve) hours that my deputies' lives are sitting on my shoulders is very important to me. Our officers across the country are underpaid and under respected for what they put their lives on the line for. They choose to have this as a career not because of the money, but because they care about the civilians, as well as other officers. So please take into consideration the importance of them being able to communicate.

I am pleased that the FCC is investigating the nonsense that happened during super half time. My roommates and I were shocked, of course, but I cannot imagine how terrible it would be if I had my little brother, or even in the future when I have children, and we were peacefully watching the football game (I mean come on, it's practically an American pastime to watch the football if no other games, even if one is not a fan) and such filth is played on broadcast TV.

As an American, you have my support to stop nonsense like this from happening ever again by all means necessary.

Timothy Clark

Dear Commissioner Martin,

Emergency response communications have never been more critical, or more difficult.

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

Commissioner Michael J. Copps  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Dear Commissioner Copps,

Emergency response communications have never been more critical, or more difficult

That's because of a common problem on police, fire and EMS radios: interference. Interference, garbled or dropped communications, inhibits first responders from doing their jobs safely and effectively. Essentially, if first responders can't communicate, they can't help and may themselves be in danger.

There is a solution before the FCC: the Consensus Plan. Over 300 public safety organizations, local governments, and congressional officials support this Plan because it eliminates interference before it occurs and at no additional cost to federal, state or local budgets - or the American taxpayer.

The 300 Consensus Plan supporters that have filed with the FCC, along with John Walsh, host of America's Most Wanted, recognize the importance of communications for America's police, fire and EMS workers. This problem has existed long enough, and our first responders deserve better. I am asking you to help.

Please listen to the voices of public safety. Our neighborhoods, families and fellow public safety professionals cannot afford to wait any longer.

Sincerely,

ANNA BELL
