

I support this petition from the ARRL. to reduce the amateur radio license to NOVICE, GENERAL, EXTRA.. I also support the petition to do away with CODE as a testing for a amateur license..Code has been done away with by a number of other country's and even the Military no longer use code, If the old hams want to do code they can do so but to make all amateurs learn code is not in the best interest to the public,By doing away with code and allowing new amateur take the test and get some HF and VHF/UHF spectrum will bring in a lot of new younger people to our Hobbie..
