

The of un-resolved amateur request for rule maing is been back shellved by the FCC Cheerleaders [Commissioners]over the BPL issues.
This item has digital mater built in, but perhaps kicking off all the existing AM'ers, FM'ers in 10 meter segment is un-wise.

In the late 1930's or so the AM calling frequency was 28.400 Mc
today its SSB truff.

The commision has stressed frequency sharing.

The Communicater Class at one time in history came from a proposal to
all un-coded tech's use 2 mhz of the 220 band this failed.

However the Communicator Class I like the Name - I hope it Sticks and
replaces the Novice class name.
