

Why are you bending over to the cable cartel's monopoly on broadband????? let us as consumers have a choice of ISPs for broadband. In a year and a half my broadband access fee has gone from \$30 to \$57. Im an ex-AT&T that now has Comcast.. They claimed they would not raise rates at the completion of their buyout but within one month my fee DOUBLED. I dont see America going broadband at such rediculously unreasonable rates. I want (DEMAND) to have a choice of broadband providers. Its rediculous to have the FCC protect cable companies MONOPOLISTIC ways. Broadband is a COMMUNICATION SERVICE. Protect the consumer not the MONOPOLY!!!!!!!!!!

We need FREE MARKET COMPITITION with broadband. After all this is still AMERICA is it not?
