

Its time to let America be America, home of free speech. Howard Stern should not be taken off the air or fined. Let Americans make their own choices and let this country be less like the Soviet Union. Your decisions are poor and not the majority of Americans. I think you need to find out how many people actually are offended and how many are actually offended by the decisions you make for us. You are not doing this in the best interest of the country, your doing this in the best interest of yourselves and whatever illegal kickbacks you get from the Republicans!!!!!!
