

I agree with MOST of the arrl proposals for changes in license structure for amateur radio. One change to these proposals should be that there would be a separate exam for morse code at 15 wpm given to AMATEUR EXTRA license holders. Upon passing this exam the AMATEUR EXTRA would receive a "AMATEUR EXTRA LICENSE" with "CODE ENDORSEMENT". This "CODE ENDORSEMENT" would permit the holder to use the AMATEUR EXTRA cw portions of the bands. This would allow the Amateur to acheive top license with only 5 wpm and if he so choses, could take the 15 wpm exam and operate in the Extra cw subbands. John W Schneider
