

While this proposal has some merit. I support the ARRL restructuring proposal in RM-10867. I believe it is the most logical and well thought out plan which provides a fair compromise to meet the goals of the Amateur Radio Service of the future as well as reducing the administrative burden on the FCC. The topic of the Morse code requirement has taken on an almost religious zeal with strong feelings and emotion on both sides. I believe while not satisfying either party the ARRL proposal is a just compromise and should be implemented by the FCC without delay. Thank you. Rick Nz2I
