

Dear FCC-

Once again it seems we're in a situation where the FCC wishes to limit on-air competition.

The same group that is trying to prevent satellite radio providers from carrying local traffic and weather has tried to block every innovative technology that has been warmly welcomed into America's homes and cars. In the 1940's, radio broadcasters tried to squash television. In the 1970's, AM broadcasters tried to put the kibosh on FM stations. They never win and they never learn.

Please reject the NAB's petition 04-160. I support satellite radio's right to provide all types of radio content, even if it competes with local stations.

Sincerely,

Amy M. Miller
