

This will serve as my formal plea for you reject the plea of the NAB lobbyist organization and allow freedom of all satellite radio listeners to enjoy any local programming they want to hear. This smacks of favoritism to an industry that has failed to keep up with the times. We must preserve our right to be able to make choices. That's what makes us a great democracy.

Please don't pander to special interests, listen to the consumer and do the right thing. I love my satellite radio AND my FM stations. There is room for both, whether the NAB agrees or not...

Thanks,
Mark R. Bounds
