

I have been a subscriber to XM radio for the last couple of years and am thrilled with the value I get for my dollar. Their recent addition of local traffic and weather has been an great addition to a already great service. The instant nature of the broadcast allows quicker decision in traffic which is a plus for traffic safety. Being a traveler the knowledge that I will never have to search for stations allows me to keep my attention where it belongs, on the road.

The attempts by the NAB to restrict XM's ability to provide programming features they are unwilling or unable to provide are a great example of free enterprise being stifled. The NAB shouldnt worry so much about traffic and weather, but the total quality of XM broadcasting which far surpasses anything offerred over the air alone.

Thank you
Robert Brown
