

XM radio / entertainment is the best thing to come along since cable TV. I live in Omaha Nebraska and there is not one decent radio station in the entire area. There is no variety and commercials run non stop. If I were to need traffic or weather information I would be hard pressed here. The tornado would have already passed through before any of these broadcasters would interrupt any of their ads. We are not on XM's list for traffic or weather here but I have listened to it and I can easily see how this would be a great SERVICE to those who commute in the larger cities of this country. I pay for XM. I would not be doing this if their content were available elsewhere for free. It's NOT. Please consider XM's customers first and rule against the greed of the broadcasters who are bringing this action. Thanks for your time.
