

Dear Sirs,I oppose the passage of HR 4026, on the grounds that satellite radio should have the same rights and privilages that any other broadcasting organization has. It is a bad idea not to foster a competitive approach to radio braodcasting, and to exclude or eliminate the program formats available. This will send a negitive image of our FCC to all users of radio and sets a bad presedent for the future of expanded radio coverage.

Sincerely Yours,  
Russell Canning
