

To Whom It May Concern:

As a PAYING customer of XM Satellite radio I should have the privilege of hearing traffic and weather on my XM receiver. It is ridiculous that a petition is seeking to prohibit my ability to hear this type of broadcasting on XM. As a citizen of the United States I WILL NOT stand for censorship particularly when I am PAYING for a service of my choosing. If the FCC bends to the will of NAB I will have no choice to moderate my voting towards those members in congress who will not be influenced by NAB.

Sincerely,

Marc Gillitzer
