

I oppose bill HR 4026. I pay for the use of satellite radio just like you pay for cable TV. I can listen to what I want without commercials or listen to updated traffic reports when I am traveling. I have found that satellite radio is the best thing that has happened to communications in many years. It would be wrong to try and undo what they have built, quality radio and what the listeners want to hear. The area I live does not have a variety of news, weather, and traffic reports. I rely on traffic reports even in my job. Satellite radio is great leave it alone.
