

i pay a monthly fee (\$10.59) for xm satellite radio, and it is well worth it. now that i have xm, i rely on it for everything i need in the form of news, weather, traffic, sports, and music. i suggest that the FCC stay out of xm's business, and continue its ruination of fm radio, and television. i support satellite radio, and i ask that you please not restrict it. after all, i pay for xm and its services. fm radio is free, so the fcc can mess it up as bad as they want. in fact, i predict that fm radio will be obsolete in the future, due partly to the fcc and their political games. hey fcc, do something right for once, and reject the NAB's petition 04-160. thank you.
