

Support diversity, XM and Sirius have done nothing wrong. People in this nation deserve a choice. The federal government has absolutely no grounds on which to legislate this issue. If the NAB wants to keep customers listening to FM and AM station then they must change their business model and keep up with the times. I listen to XM because I get a wider variety of music and better news coverage than I can get from any station in my area. Please do not restrict anymore freedoms than you already have, I implore you to tell the NAB to become more competitive as times change. Thank you.
