

I purchased XM Radio service because I wanted more variety and quality service. Both of which I've received and am extremely happy with. Rather than the NAB soliciting the FCC to stifle competition, they should concentrate on improving their service.

If petition 04-160 is approved, then the FCC is guilty of giving in to lobbyists and special interests. XM Radio is a subscriber service and therefore should be left alone to provide a forum of true free speech. Everything on FM/AM is censored to the point where I do not want to listen. Please leave XM alone and let those of us who pay for their service decide what programming we want to have available to us.

In the interest of free speech and the free market system, please reject NAB's petition 04-160. It should not be the responsibility of the FCC to offer the NAB the power to dictate programming for a service that Americans are paying a premium for.

Thank You,

Steve Sarcevic
