

To Whom It May Concern:

I feel that this is a service that I pay for and should not be limited by the FCC. XM provides me with entertainment and critical news everyday (ie. weather/traffic)!! One of the reasons I chose to buy satellite radio was because it was not going to be censored or monitored. I use the traffic and weather feature every single day! On the way home from work I turn it on and choose which route I am going to take to get home, I use it to plan outings according to the weather. To take away this service would be a tremendous loss to us XM customers!! Please reject the NAB's petition 04-160!!! The local traffic is very hard to catch and they never seem to be talking about my side of town, or they are not aware of traffic going on with my route home. With XM I have not had this problem. Thank you for you time and THANK YOU for listening to the people!!!
