I have owned xm radio since it was introduced.I enjoy listening to xm and the variety of music it offers. Though I get the traffic and weather channels on my xm radio I live in a area where they do not give my weather or traffic updates so i usually listen to my local fm stations in the morning.If i lived in a area where the traffic and weather channels would benifit me and given a CHOICE i would listen to xm radio.Im not totally against fm radio i just dont understand the problem with xm broadcasting traffic and weather.Im just saying i think xm radio is a good thing and therefore I oppose NAB's petition 04-160 and i believe the FCC should too.I believe if you had a choice between xm and fm you would listen to xm radio.
