Satellite radio provides variety and quality that are not available any where else. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. Plain and simple, they are trying to censor satellite radio. Last time I checked, that's a first amendment violation.

I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand, deserve, and spend MY money on. Thank you.
