

Satellite Radio is a welcome change to the regular AM/FM radio, especially on long trips across some of the wide open spaces in the Western part of the U.S. where regular Radio signals are hard to receive or non-existent. The National Association of Broadcasters (NAB) are feeling a little competition and don't like it. I feel that XM Radio has every RIGHT to broadcast Weather and Traffic information. On a recent trip to San Francisco the XM Radio Traffic station gave me very valuable traffic info that aided me to make a decision on which road to use in the Bay Area. My vote is to leave XM Radio broadcasting Weather and Traffic info which keeps US the public very informed.
