

I have a complaint with Channel 9 news in Denver, Colorado. At times their news broadcast is not captioned; I have called to complain only to be greeted with rudeness. They have also not fixed the captioning when I did call to complain. They need to change their attitude to the deaf and hearing impaired so we can watch their news broadcast as well. Don Perez is their Engineering director. His email is: don.perez@9news.com. The contact information of 9 News is:
