

This is unnecessary legislation since it would give our company a crushing burden both in expenses and operational difficulties. We would incur dramatic increases in the hard costs for tape, and we would need additional personnel and an increase in man hours to keep up with this requirement. This would be exacerbated further when we have multiple broadcasting through digital. This type of requirement is completely unnecessary, especially when considering that the rules of enforcement are ambiguous, and any violations for TV have been insignificant at best...a tiny %.
