

Docket Number 00-168

I support the FCC adopting a public disclosure form for information on television programming. Television stations must be held be accountable. Those of us who rely on captioning cannot depend on the good faith of television stations to comply with captioning requirements. We need to know how many hours of programming were required to be captioned, whether they have met closed captioning requirements and which programs were not captioned. We need this information to be able to call them to accountability
I appreciate having the opportunity to comment on this.
