Re: WC Dockets 04-36 & 03-211

Dear Ms Dortch:

This is to notify you that Jonathan Banks, Lyn Rogers-Haney, Allison Brown, Beth Shiroishi and the undersigned, all of BellSouth, met on October 6, 2004 with staff from the FCC's Wireline Competition Bureau to discuss the appropriate jurisdiction and definition for IP-Enabled Services. The attached presentation was distributed and formed the basis of our comments. FCC staff present were Tom Navin, Terri Natoli, Julie Veach, Christi Shewman, Michael Goldstein, Darryl Cooper, and Russ Hanser.

Pursuant to Commission rules, please include this notice in the record of the proceedings identified above.

Sincerely,

Attachment

BellSouth VoIP Service

October 6, 2004

>> BellSouth VoIP Service

Voice over Internet Protocol (VoIP) is an IP-Enabled Service

- IP-enabled services should include both services and applications that rely on the Internet Protocol (IP) family

These services can include both information services and telecommunications services

- The term IP-enabled should be defined so as to include any voice, data, video, or other form of communication service provided by any type of communications provider (including telephone companies, cable companies, wireless providers, satellite companies, power line companies, ISPs, or any other type of entity) whereby some part of such service is originated or terminated by the customer in the Internet protocol and transported over an IP platform

VoIP Services = Information Services

Information Services are subject to the same regulatory requirements as traditional voice services. This includes the same rules regarding interstate and international service, as well as the same rules regarding the provision of emergency services.
