

Dear FCC,

I don't know your political leanings, but I know that it is against the law to use public airwaves to slander anyone . It is also against the law of campaign finances to present a political ad without equal time with equal placement. Sinclair Broadcasting is subverting the Public Trust which means they are corrupting the National elections by using their Monopoly of National Stations.

If we are to maintain our Democracy , a true account of John Kerry's Record from his friends as well as his enemies should be told. If they want us to know this, man it should not be with bias.

If the "Stolen Honor" opinion piece is shown, then FCC should in fairness , show "Up River," a representation of the actual events by people involved .It should follow or be shown the next night at the same time and through the same stations. PBS has run a good and thorough program on Frontline recently showing the lives of both candidates from early childhood to now. This should be a example of honesty in journalism.

The Sinclair group must be warned that airing a biased report with such wide exposure would taint and unfairly influence the electorate, and would be met with immediate revocation of all licenses pertaining to the use of Public Broadcasting . It is an abuse of the Public trust.

Thank you for protecting the precious integrity of the free press. The presence of the FCC is vital to our democracy.

Sincerely ,
Judith L. Merulli, voter
