

K Love exclusively provides my area with commercial free Christian music that is safe for family to listen to. If it were gone I could not in good faith allow my eleven year old daughter to listen to a different signal unless under adult supervision because of the music content but also the commercial content. Commercial for such things as condoms, topless bars and alcohol. K Love serves the public interest by offering an alternative to secular views that are not always healthy and safe. I also support the signal by sending in \$1000.00 annually to underwrite the cost of the signal since K Love is required to be listener supported due to the type of license they received from you. Respectfully, Kirk Riggs
