

K-LOVE is an important part of my life, my community, and enhances unity nationwide as it is broadcast in many areas of the U.S. K-LOVE's content is family friendly, wholesome, and nurturing for children and adults. It is family building, giving expert ideas on various marriage, single, and child rearing issues. It is helping to keep American families strong and healthy. It is something unique to find a station that both parents and teens can listen to and enjoy together. It is a great encouragement to myself and my family members and friends when we are going through tough times. It provides a hotline for suicidal people, as well as people going through lots of other difficult life situations. When I turn on K-LOVE in the morning, it helps give me the energy to get through the day and look at life with a positive perspective. Please let us keep K-LOVE. It is an integral important part of my every day. I request that you please do not replace the K-LOVE signal with an LPFM signal. I believe it would be a huge step backward in the radio industry to make such a change.

Thank you for preserving K-LOVE.
