

I am writing to let you know that I oppose the LPFM over the FM translator service. I listen to K-Love radio station every day on 106.7 in my area in NC and my family and I enjoy it so much. So much that when we travel to different states we are able to listen to

K-Love as well. Last November we traveled to California and drove up Hwy 1 along the coast and was able to tune in K-Love radio station and it was such a blessing to our family especially at sunset along the coast. I desperately would hate it if I could no longer pick up

K-Love radio station, it truly is an inspiration to me and our family. My heart would be broken if it was no longer available. Thank you for your consideration of our comments and helping keep the FM translator airways open and available to the public. The public so much needs to have K-Love available to them - its so inspiring and uplifting - something that our community and world needs more of today and in the times that we are living in. We need a positive influence radio station esp when all the other types of media/news reports are so negative.

Thank you and Best Regards,
Revonda Morse
