

This comment is in regards to the broadcast announced by the Sinclair Broadcasting Group. I am disgusted that the FCC is allowing this organization to promote editorialized, partisan, propaganda disguised as news, that is calculated so as to influence an election. It is clear that this organization has some legal obligations to the public, and that the FCC is not holding them to that standard of fairness or decency. The abuse by Sinclair needs to be considered when they apply for licensing as well. Clearly they are not being held accountable, and the FCC is engaging in partisan politics as well. I can only hope that the influence of the American people can in some small measure, hold accountable the FCC.
