

I wish to let the FCC know that I am against LPFM expansion that would take priority over current FM translator services, specifically my local K-LOVE station on 106.7FM.

K-LOVE is the only way I hear about local Christian and non-profit events in the area. I know of many people in my location who keep in touch through this broadcast. Most importantly, it is also the only station in my area that promotes high moral standards and is free from questionable language and situations. This would be lost from the community if K-LOVE was replaced by an LPFM broadcaster with other programming.

K-LOVE is completely listener sponsored and is still growing in listener numbers and new translators. I believe this reflects the strong public interest in this type of broadcast.
