

To: FCC

I wish to register my complaint about Sinclair Broadcast's expected airing of a politically charged program on John Kearey (10/22/04) under the guise of a "special NEWS event" (a quote from Sinclair Broadcast's web site). It is vitally important that the NEWS put forth over the public airwaves be as objective as possible so as not to be confused with an editorial point of view. There are specific rules and regulations covering political messages sent over the publically owned airwaves. I request that the FCC do its job of enforcing these regulations. Also, it is a problem when one broadcast organization as untrustworthy as Sinclair that owns 60+ stations continually breaches the public trust.

These are important issues. The quality and variety of news transmitted over our public airwaves has suffered in the last several years. I would like to see something done to reverse this process. Thank you in advance for your attention to this potentially serious problem to we, the people.
