

Dear FCC Associate:

I am writing in regards to FM station Air1 radio and my concern for the station being replaced through transition into LPFM. Air1 radio is on 88.7 FM in Phoenix, AZ and has been an extremely important part of my radio listening experience. Air1 has offered a great opportunity for me as a resident in my local community to hear positive songs, news radio broadcasts, and inform me in ways in which I can make a difference in the Phoenix community through active Air 1 interests such as voting, being courteous to my fellow neighbor, being positive to my neighbor and community, and changing and renewing a fresh new, positive perspective on how I view my local community in Phoenix.

Because of the possible replacement of LPFM of Air1, I fear that this will leave myself as well as other members of the Phoenix community without a chance to hear positive airwaves and obtain encouraging productive information in the local community. Air1 provides a positive experience for many of my friends and members of my community that helps them to live each day with more joy and a willingness to make a positive difference not only to their immediate neighbors, but their local community. Air1 is a very unique radio station; it is the only radio station appealing to my interests as well as many others in the community. To have Air1 replaced would mean losing a special, meaningful, unique listening experience. Because of Air1, FM radio is listened to more.

Please consider the positive impact, the positive attitudes, the contagious friendliness, the wanting to do better, the willingness to create a better world, the increase in positive productiveness, the spread of love, the acceptance of our fellow neighbor, the extension to a needy community, the helping of the underprivileged, and the charity that fills the hearts of Air1 listeners when deciding to keep FM translators in existence. Thank you for your time in this matter.

God Bless You,
Tyson Lahti RN
Phoenix Air1, 88.7 FM Listener
