

During the last four years, the Air 1 radio station in my area has made a huge impact on my life. As a college student with a full time job, I don't find much time for regular church attendance. Air 1 allows me to have the encouragement I need with me at all times via the radio and internet. I don't listen to anything else.

If Air 1 were taken off the radio, I would be devastated. Besides Air 1, there is almost no quality radio programming currently on the air. If Air 1 were replaced, it would give me and hundreds of thousands of others nothing positive to hear. Not to mention, Air 1 serves the community by giving support to people in need. They have people there all the time to take calls from people either considering suicide or just feeling lost. They support homeless shelters and encourage kids to stay off drugs and out of trouble. They raise funds for orphanages and many other positive things. Without Air 1, these things would be lost. Air 1 truly makes a positive impact not only in our cities around the United States, but also all over the world where it is broadcast online. Please don't take my Air 1 station away.
