

Dear Sirs,

I would like to express my concern for changes proposed for FM stations such as AIR1.com by the newly developed LPFM. As a local homeowner and small business owner, I would love to see stations such as AIR1.com continue to be able to broadcast in local cities accross the US on on-line.

AIR1.com provides a music style that I am otherwise unable to find in my city. I would also be disapointed to find other stations that I listen to currenty be put at a disadvantage for the benefits of LPFM staions.

I feel keeping stations such as Airl are in the publics best interest and should not be penalized for the sake of others.
