

K-LOVE is a very important to our community. It is one of very few radio stations people of all ages can listen to that is positive and does not have to be censored for our children. I've known people going through some very hard times who listen to KLOVE for words of encouragement and comfort just to get through their day.

I listen to it each day to prepare me each day to deal with the negatives in my work in a positive and christian manner.

In working with youth, I've found it is the one radio station I can tune them into where there is music they really like. That they can sing along with, dance to, close their eyes and concentrate on. It does not have the influences of violence, sex, or drugs like so much of the popular music has these days.

Not only youth, but adults love the music, news and good word that K-Love has to offer.

Please do not override the K-LOVE radio ration on our FM translators by allowing LPFM stations to take priority over this. We have so few options of this type. It is NEEDED in our community. A service such as this is VITAL to the future of our youth.

Thank you.
